PRECISION AGRI-TECH PLATFORM · CAPSTONE EVALUATION REPORT

Farm Health & Performance Report

Multi-Modal Crop Health Auditing, Soil Diagnostics & Agronomic Planning

FARM: MY AHMEDABAD FARM

REGISTERED FARMER	ACCOUNT IDENTITY	PRIMARY HOLDING	REPORT GENERATED
Hamzah123	hamzahsaiyed15@gma...	My Ahmedabad Farm	2026-10-29 10:54

01 | EXECUTIVE SUMMARY & PERFORMANCE INDICATORS

TOTAL FARMS	REGISTERED CROPS	TOTAL LEAF SCANS	SOIL HEALTH INDEX
1	0	6	100/100
Selected Holding	Cultivated area unset	100% Simulated Demo	Excellent (5/5 params)

DIAGNOSTIC INFERENCES DISTRIBUTION (SCOPE: SELECTED FARM: MY AHMEDABAD FARM)

Healthy Plants: 0 (0%) · Diagnosed Conditions: 5 (83%) · Demo Scans: 6 (100%)

02 | FARM PORTFOLIO & CULTIVATION OVERVIEW

Farm Holding	Location	Area	Crops & Varieties	Status
My Ahmedabad Farm	Ahmedabad, Gujarat, India	Not set	No crop varieties registered	ACTIVE FOCUS

03 | PLANT DISEASE & PEST DIAGNOSTIC AUDIT

Scan Date	Crop	Diagnostic Finding	Type	Confidence	Inference Mode	Association
Oct 27, 2026	Unspecified	Wheat Leaf Rust	DISEASE	N/A	[DEMO] Fallback	Sole Farm
Oct 27, 2026	Unspecified	Rice Brown Spot	DISEASE	N/A	[DEMO] Fallback	Sole Farm
Oct 27, 2026	Unspecified	Corn Northern Leaf Blight	DISEASE	N/A	[DEMO] Fallback	Sole Farm
Oct 27, 2026	Unspecified	Corn Northern Leaf Blight	DISEASE	N/A	[DEMO] Fallback	Sole Farm
Oct 27, 2026	Unspecified	Leaf Miner	PEST	N/A	[DEMO] Fallback	Sole Farm
Oct 27, 2026	Cotton	Potato Early Blight	DISEASE	N/A	[DEMO] Fallback	Sole Farm

04 | SOIL CHEMISTRY & NUTRIENT PROFILE

Date Tested	pH (Ideal 6.0-7.5)	Nitrogen (20-50)	Phosphorus (15-40)	Potassium (20-45)	Moisture (30-70%)	Status
Oct 27, 2026	7.0	23 kg/ha	21 kg/ha	29 kg/ha	45%	Tested Sample
Oct 27, 2026	7.0	30 kg/ha	29 kg/ha	25 kg/ha	45%	Tested Sample

05 | PREDICTIVE CROP YIELD MODELLING (ADVISORY ONLY)

Estimate Date	Crop	Season	Estimated Yield	Area	Basis & Methodology
—	No yield estimates generated yet.	—	—	—	—

06 | ACTIONABLE AGRONOMIC DIRECTIVES & INTERVENTIONS

Issued	Category	Directive Title	Agronomic Summary & Prescribed Actions	Priority
Oct 27, 2026	TREATMENT	Treatment for Wheat Leaf Rust (simulated detection)	Reason: Simulated detection: no trained model is loaded, so this is general guidance for the label shown, not a diagnosis. Suggested action: Apply propiconazole fungicide. Plant resistant varieties. Early sowing.	MEDIUM
Oct 27, 2026	TREATMENT	Treatment for Rice Brown Spot (simulated detection)	Reason: Simulated detection: no trained model is loaded, so this is general guidance for the label shown, not a diagnosis. Suggested action: Apply mancozeb fungicide. Ensure balanced nutrition. Use certified seeds.	MEDIUM
Oct 27, 2026	TREATMENT	Treatment for Corn Northern Leaf Blight (simulated detection)	Reason: Simulated detection: no trained model is loaded, so this is general guidance for the label shown, not a diagnosis. Suggested action: Apply foliar fungicide. Use resistant varieties. Practice crop rotation.	MEDIUM
Oct 27, 2026	TREATMENT	Treatment for Corn Northern Leaf Blight (simulated detection)	Reason: Simulated detection: no trained model is loaded, so this is general guidance for the label shown, not a diagnosis. Suggested action: Apply foliar fungicide. Use resistant varieties. Practice crop rotation.	MEDIUM
Oct 27, 2026	TREATMENT	Treatment for Leaf Miner (simulated detection)	Reason: Simulated detection: no trained model is loaded, so this is general guidance for the label shown, not a diagnosis. Suggested action: For Leaf Miner: Apply appropriate insecticide. Use integrated pest management (IPM) strategies. Monitor regularly.	MEDIUM
Oct 27, 2026	TREATMENT	Treatment for Potato Early Blight (simulated detection)	Reason: Simulated detection: no trained model is loaded, so this is general guidance for the label shown, not a diagnosis. Suggested action: Apply chlorothalonil or mancozeb. Remove lower infected leaves. Maintain soil moisture. Crop: Cotton	MEDIUM

AGRONOMIC ADVISORY NOTICE & CAPSTONE REPORT DISCLOSURE:

1. Plant disease scans marked "[DEMO] Fallback" were generated by mock detection pipelines when AI model weights were offline.
2. Predicted yields represent mathematical algorithm estimates for seasonal planning and must not be treated as harvested scale weights.
3. This report provides advisory guidance only. Physical verification by certified agronomists is recommended before chemical intervention.
